ZARSUITE · JEWELLERY SHOP MANAGEMENT

Modern Jewellery Shop Management Made Simple

Sell, buy and exchange at the counter. Know every gram of stock. Let prices follow your own metal rate. One system for the whole shop.

- Point of sale: sale, purchase & exchange
- Stock by net weight, purity and tag
- Prices that follow your saved metal rate
- 15 ready-made reports — CSV & PDF
- Cash, bank & udhaar (customer credit)
- Multi-shop, staff permissions & salaries
- Invoices customers can verify by QR
- Works on phone, tablet and desktop

Simple. Scalable. Powerful.

One counter. Three ways to trade.

Sale, Purchase and Exchange sit side by side at the top of the counter screen — large, colour-coded tabs, so staff always know which mode they are in.

SALE

Scan, price, get paid

Scan a tag or search the stock. The price comes from the item; discount, tax and extra charges are added on the same screen. Paid in cash, by bank, or on credit.

PURCHASE

Buy from anyone

Buy from a supplier or a walk-in customer. The piece isn't in your stock yet? Describe it right there — it is created only when the purchase is saved.

EXCHANGE

Old for new

The customer hands over old gold, silver, platinum, diamond jewellery or any other material. Valued by weight, purity, kaat and your buying rate — or an agreed value. Only the difference is paid, either way.

Also at the counter

Extra invoice charges

Box or packaging, delivery, service — or a line you name yourself. Added to the total and printed as separate lines on the invoice.

Buy what isn't in stock

Search, then “Continue with new item”. The piece is created, tagged and linked to the invoice when the purchase saves. Walk away, and nothing is created.

Pay any way

Cash, bank transfer or udhaar. Part-payments settle later, and the customer's balance updates itself.

Invoices customers can verify

Every PDF invoice carries a QR code. Customers scan it with a phone camera and see the invoice online — no app, no login.

Scan the tag, sell the piece

A USB or Bluetooth barcode scanner adds the exact piece to the bill.

Quote in seconds

The jewellery calculator prices any piece from weight, purity, your rate, wastage, making and stones.

OLD ITEMS, ANY MATERIAL

Gold by karat and ratti. Silver, platinum and diamond jewellery by purity. Anything else by weight or an agreed value. Every old piece goes straight into stock.

Stock that knows its metal.

Every piece is recorded the way a jeweller thinks about it — metal, purity, weight and stones — so your stock and its value are always exact.

GROSS		STONES		NET METAL		WASTAGE		TOTAL	→	PURE GOLD
12.500 g	−	0.500 g	=	12.000 g	+	0.600 g	=	12.600 g		11.550 g

A 22K ring, worked out live as you type — in grams and in tola · masha · ratti.

1 Every metal, every purity

Gold 24K to 14K, silver, platinum, palladium, diamond jewellery and other materials. Pieces or bulk lots, stock or customer orders.

2 Stones & charges in detail

Carats, rate, colour, cut and clarity for each stone. Making, goldsmith and lacquer charges per piece.

3 Photos & weighing scale

Several photos per piece, straight from the phone camera. “Get Weight” reads a USB scale.

4 Printable tags

Automatic tag numbers, barcode or QR, five label sizes — from the jewellery tail tag to a full A4 sheet.

5 Shop, tray & supplier

Every piece knows its branch, tray and supplier. Moving it to another shop is recorded on both sides.

6 Every change on record

Quantity, weight or shop changes keep who, when, before and after — and why: physical count, damaged, lost or corrected.

7 Alerts before you run out

Set minimums per category, or per metal and purity. Low and out-of-stock lines are flagged for you.

8 The full story of each piece

Open any piece to see everything that happened to it — bought, adjusted, moved, sold.

MOVING FROM REGISTERS OR EXCEL?

Bring your existing stock in from a ready-made Excel template — no retyping piece by piece.

Prices that follow your metal rate.

Enter today's rate once. Every piece priced from it updates itself — and the price you paid never changes.

1
Save today's rate
Buying and selling rates, per metal and purity.

2
Stock reprices
Every matching piece updates itself at its own purity.

3
Cost stays fixed
The purchase price stays exactly as bought.

4
See the change
Stock Revaluation shows the gain or loss.

COST PRICE
What you paid
Fixed forever — so purchase history and profit always stay exact.

CURRENT VALUE
What it's worth today
Metal at today's rate + making + stones + other charges + your margin. Moves with your rate.

One rate, every karat
Save 24K and 22K, 21K and 18K follow in proportion (22/24, 21/24, 18/24) — or set each purity yourself.

Only the metal moves
Net + wastage weight is revalued at its purity. Making, stones and your margin carry over.

Fixed price when you want it
Lock any piece to a fixed price and it ignores rate changes.

Full rate history
Metal · previous rate · new rate · changed by · date and time — and how much stock each change repriced.

Every piece, fully explained
Cost, today's rate, purity, net weight, metal value, charges, selling price and profit — on one screen.

Catch up in one tap
Stock added before you started saving rates? One button brings it all to today's rate.

THE MARKET RATE IS FOR REFERENCE ONLY

The dashboard shows live gold, silver, platinum and palladium rates. They never touch your prices — prices follow the rate you save, and nothing else.

15 reports. Answers in one tap.

The dashboard opens with quick summary cards. Tap any card to open the full report behind it.

Stock · Sales & purchases · Money · Stock control

STOCK
Metal Stock Summary
Gold, silver, platinum, palladium — net metal weight by purity.

STOCK
Purity / Karat Stock
Pieces, gross, stone and net weight, and value, per purity.

STOCK
Jewellery Category Stock
Rings, chains, sets and your own categories.

STOCK
Current Stock
Every piece with purity, weights, cost and today's value.

STOCK
Stock Valuation
At cost, at tag price, and metal at your buying rate.

STOCK
Stock Revaluation
What the latest rate change did to stock value.

STOCK
Low / Out of Stock
Pieces, categories and purities under their minimum.

STOCK
Dead / Slow-Moving Stock
Unsold 30 to 365 days — and the money it ties up.

SALES & PURCHASES
Sales Report
By day, week, month or year — by metal, purity or staff.

SALES & PURCHASES
Purchase Report
What was bought, from whom, and what is still owed.

SALES & PURCHASES
Exchange / Old Jewellery
Old items in, new items out, and the difference paid.

SALES & PURCHASES
Profit & Margin
Sale – cost – discounts, by item, category, metal or staff.

MONEY
Cash / Bank / Credit
Money in and out, balances, and who still owes.

STOCK CONTROL
Stock Movement
Opening, added, removed, closing — and what caused each.

STOCK CONTROL
Stock Adjustment / Audit
Every manual change — who, when, how much and why.

FILTER BY: Date · Shop · Metal · Purity · Category · Item · Staff

Export: Excel (CSV) · PDF

METAL IS COUNTED BY NET WEIGHT — NEVER GROSS

Gross – stones = net metal. A 12.5 g ring with 0.5 g of stones counts as 12 g of gold in every report, card and valuation.

The rest of the business, handled.

The counter and the stock are only half of a jewellery business. ZarSuite keeps the money, the people and the branches in the same place.

1 Cash, bank & udhaar

Cash book, bank lines and pending amounts. Void an invoice and its money is reversed automatically.

2 Customer & supplier ledger

Every invoice, payment and balance per person, with a printable statement.

3 Staff permissions

You decide, per staff member, who can sell, buy, edit stock, see reports or export.

4 Salary & advances

Monthly salaries, advances against salary, and printable salary slips.

5 Many shops, one owner

Each branch keeps its own stock. Every report filters by shop — or shows them all.

6 Any invoice in seconds

Find old invoices by number, customer or date range — and print them again.

7 Live dashboard

Sales, purchases and stock at a glance, with charts — plus live metal rates for reference.

8 AI voice entry (optional add-on)

Speak an entry and it is written for you.

9 Your shop's calendar

Dates follow your time zone — a late-night sale is never filed under yesterday.

10 Security built in

Each business's data is kept apart. Login lockout, short-lived sessions and an audit log of every change.

ANY DEVICE, NOTHING TO INSTALL

Runs in the browser on phone, tablet and desktop. Your records are kept online — not in a register that can be lost or damaged.

Made for jewellers. Ready when you are.

Why ZarSuite

- **Speaks your trade**
  Karat, ratti, kaat, tola, wastage and making — built in, not bolted on.
- **Your numbers, not the market's**
  Prices follow the rate you save. Cost never changes behind your back.
- **Nothing is rewritten**
  Every sale, rate change and stock correction keeps its history.
- **One system, whole shop**
  Counter, stock, money, staff and branches — in one place.
- **Built and supported locally**

Getting started

1

Book a live demo

We walk you through ZarSuite using the kind of stock you sell.

2

We set you up

Shops, rates, categories and staff — and your existing stock imported from Excel.

3

Print tags, start selling

Tag your pieces, open the counter screen and make the first sale.

Book a live demo

See ZarSuite working with your own kind of stock.
